LOTO MANAGEMENT SYSTEM

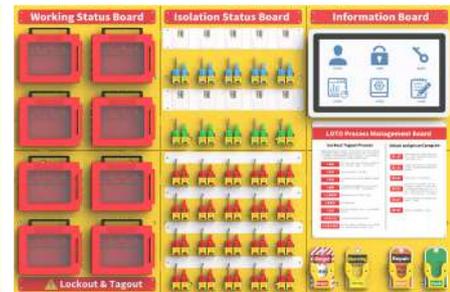

Engineered for Scalable, Organized Control of Lockout Tagout Equipment

LOTO Safety proudly presents its innovative **LOTO Management System (LOTO MS)** — a forward-thinking alternative to traditional hardware storage solutions such as LOTO stations, cabinets, and shadow boards. Designed by experienced LOTO professionals, this modular system overcomes the limitations of static setups, especially when it comes to scaling and streamlining your Lockout Tagout program.

For facilities issuing LOTO hardware from a central control area, the LOTO MS offers a series of tangible benefits:

1. Modular and Scalable Design
2. Cost-Efficient Implementation
3. Customization for Every Application
4. Enhanced Visual Control
5. Optional Portability

LOTO DEMO BOARD

Live, Risk-Free Training for Real-World Isolation Scenarios

The LOTO Demo Board is a practical training tool developed to meet a growing industry need: providing personnel with safe, hands-on experience in Lockout Tagout procedures before they perform them on actual equipment.

Train on a Range of Energy Sources

Trainees can learn how to apply LOTO hardware and follow standard procedures for isolating both electrical and mechanical sources. The board includes built-in simulation points for:

- Miniature Circuit Breakers (MCBs)
- Molded Case Circuit Breakers (MCCBs)
- Isolator Handles
- Push Start/Stop Buttons
- Emergency Stop Switches
- Key-Operated Switches
- Ball, Gate, and Butterfly Valves
- Relief Valves

All necessary LOTO hardware for these devices is pre-installed on the board, making it a complete turnkey training solution.

Portable & Practical

Designed for mobility, the LOTO Demo Board can be easily transported across departments, eliminating the need to assemble large groups in a single location and minimizing operational downtime.

For product videos or more information on incorporating this tool into your training program, visit our website or contact us at info@lotoabudhabi.com.
