

Enabling Safe and Productive Workplace

Transform the Knowledge into action that performs

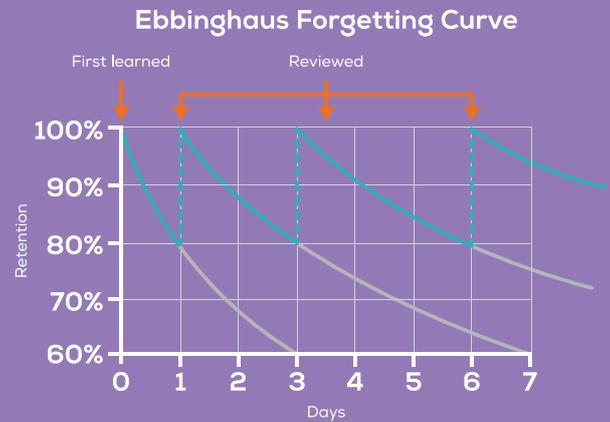

Our Services

Brigs VisuallyACTIV™ Workplace

Enabling safe & productive workplace

Smart Workplace is about right decision at right time. But how to prepare your workplace and enable your workforce to make a right decision! Usually, we try to learn all the information as part of our training programs, as part of various SOPs and work procedures. These all are the avenues to provide passive information and over the period of time we just remember-what we deal on regular basis. But to make the information active, workplace has to be visually active.

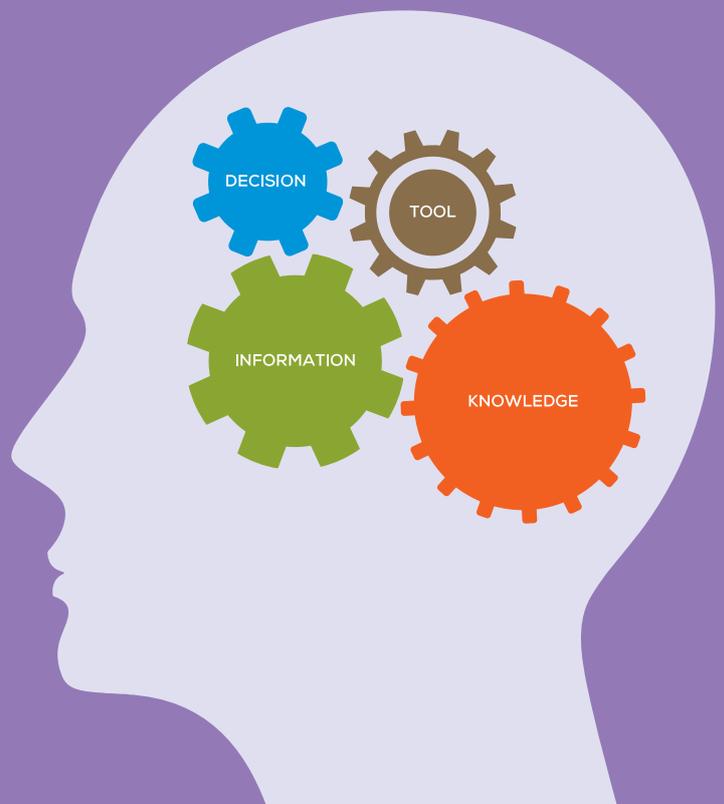

VisuallyACTIV™ Workplace

- ▶ It provides ability to be better - Learn, Understand & Reflect
- ▶ It helps to safeguard following:
 - Enhancing identification
 - Ensure comprehension
 - Enable recall

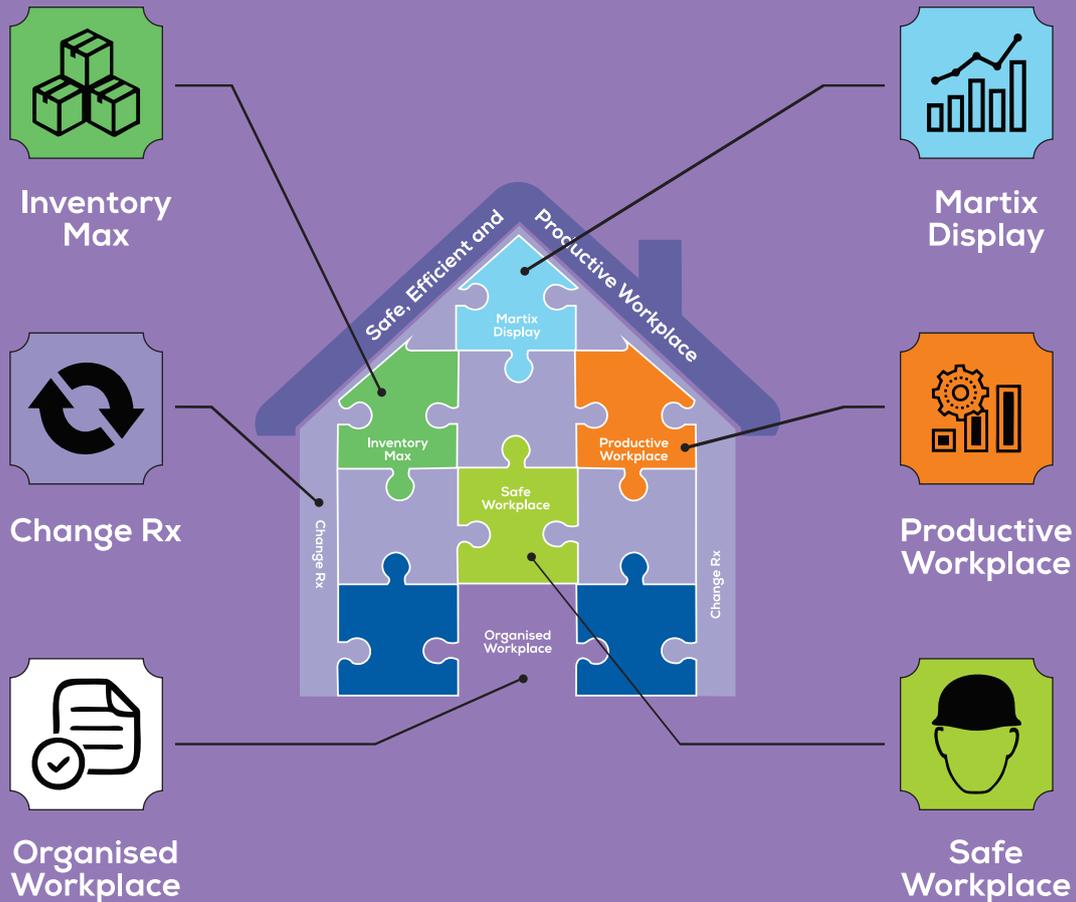

How

Right Decisions Happen

Process from information to knowledge to “right decision making” needs right visual communication process and tools. We enable the same through appropriate static and digital cloud-based program

House of Brigs

Brigs Approach - House of Brigs

Visual Workplace is usually considered as having signage at the workplace. But as perceived by Brigs (HOB) it is not just about "anything somehow" it is about being "relevant and actionable".

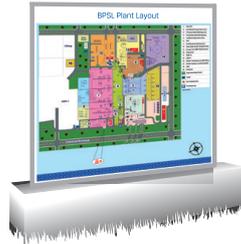

HOB is all about the right approach to the right workplace. It guides us to the path we need to follow based on your workplace need.

House of Brigs explains the right steps and right process to achieve an ESPRO i.e. Efficient, Safe & Productive workplace. This program has been formulated as per the needs of the industrial workplace.

BVeU

Digital Workspace Solutions

A powerful Digital Signage solution as part of a BVeU a comprehensive digital solution to manage and publish your contents digitally. DigiVuE is cloud based solution for managing, scheduling and monitoring your Digital Signages.

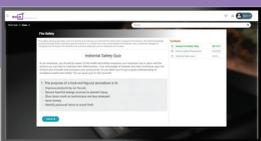

A simple and easy Document access tool powered by BVeU. Simply scan a QR-code or search for a machine / location / category, and relevant documents are presented to you in a structured manner.

A mobile application to access asset related documents such as SOP, maintenance manual by simply scanning a QR code. Also build and use custom forms to audit your assets, record and monitor critical operational parameters of your equipment.

Training application for your workforce powered by BVeU. Either in a classroom environment or off-site, you can use KnowledgeMate to create courses, securely provide access to your users, and conduct tests.

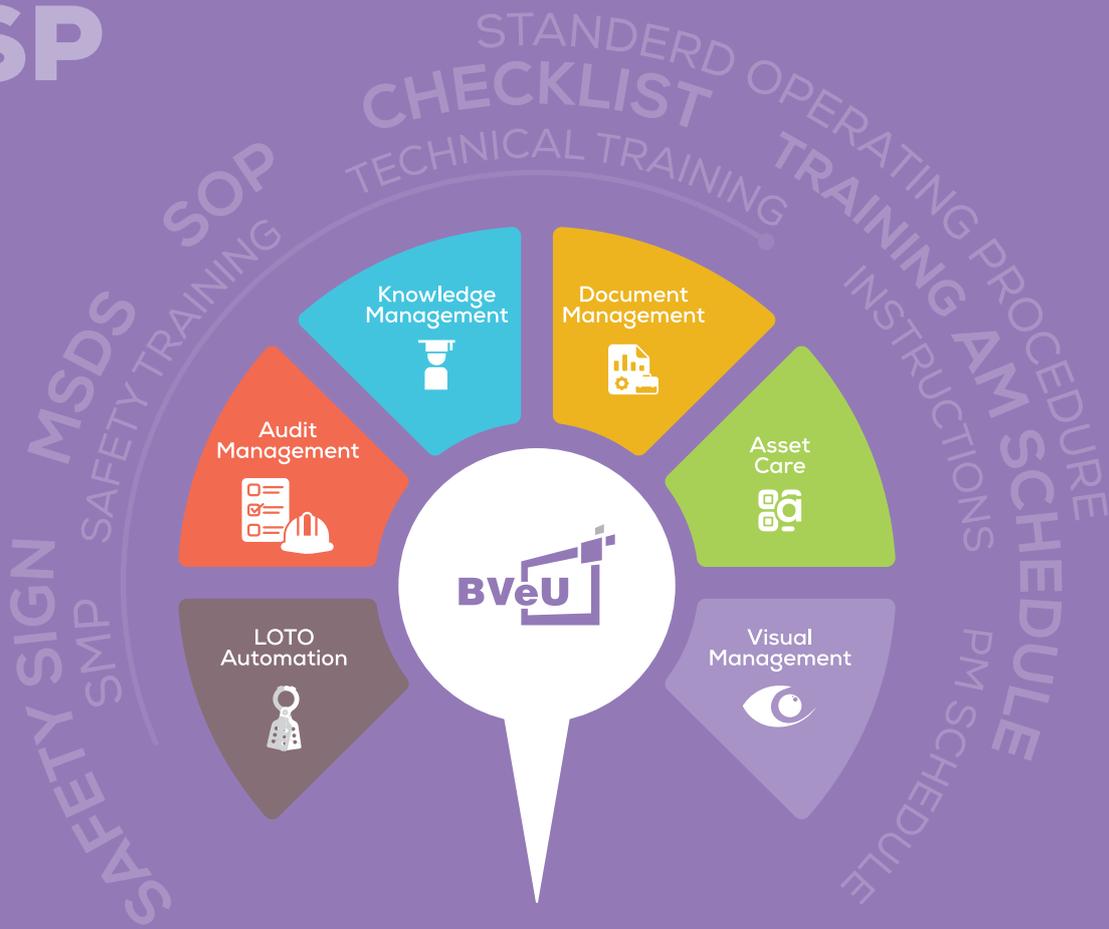

LOTOMate and AutoLOTO are mobile applications to easily create LOTO policy and automate, secure, and monitor your LOTO processes.

Get your visitors registered and trained off-site / on-site before issuing your visiting pass using this secure and simplified user management and training tool. This tool can be easily configured and managed with minimal human interference.
