

Improving Industrial Safety with Innovative Technology

We at **Value Hybrid** are at the forefront of combining IT consulting services and technological innovation to revolutionize industrial safety. Our unique offering, the **Value Digital LoTo**, is a worldwide patented system that seamlessly blends software with electronic hardware.

This innovative approach aims to fully digitalize the Lockout-Tagout (LoTo) process, making us a standout in the market. Our solution easily integrates into your system, offering user-friendliness and full traceability of LoTo procedures through Live Data Collection. This enhances job safety and ensures governance and auditability.

Our core benefits

Our system governs the hardware.
With safety as our ultimate goal, the locking hardware is dependent on management software.

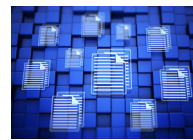

Full traceability by allowing you to know what procedure, who, when, where, and how it has been done.

Real-time monitoring and supervision capabilities with a digital twin of the procedures.

Intuitive, **user-friendly** interface, faster than pen and paper.

Automated documentation for **accuracy** avoiding manual input, pen and paper.

Digitization of the administrative process ensures **20-30% time savings** in maintenance work.

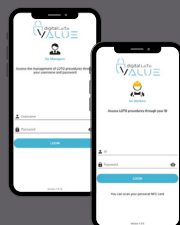

Reduce costs associated with manual paperwork, MTTR, downtime, errors and accidents in the workplace.

OUR DIGITAL TRANSFORMATION STRATEGY IS BASED ON 3 KEY ELEMENTS

WEB APPS

On-Premise / Cloud Platform Management System

USER APPS

Mobile APPs for Managers and Workers providing full Traceability and Governance of procedures and users

HARDWARE

Agnostic key-Padlock hardware, fully interconnected with all our elements via Bluetooth

Trusted by Industry Leaders
